B588 Holds **28** x 12.7mm pin stubs. Can store stubs up to 50mm Ø. Maximum specimen height 13.5mm. Dimensions 120 x 84 x 36mm.

Storage Boxes for SEM Stubs

We offer a range of boxes that will accept specimen mounts in common use. They consist of a transparent plastic box with a *white plastic insert*. The specimen mounts are a push fit into the appropriate holes and do not shake loose during transportation. There is sufficient height above the specimen (approx. 12mm) to permit the storage of very thick mounted specimens. An identification label is enclosed to record specimens.

SEM stub Preparation Stands

Our **Preparation Pods** and **SEM Stub Stands** ensure secure handling of SEM sample holders and avoid confusion when preparing multiple stubs. For pin stubs a preparation pod or block is a necessary to hold the stub in the correct position. For JEOL and Hitachi cylinder stubs the **SEM stub stands** provide a way to load, handle and transport multiple stubs. The SEM stub stands are also excellent for storing stubs and/or SEM holders in a desiccator or other storage location.

There are **two** types of **Preparation Pods** available made from hard anodised aluminium and **eight** types of **SEM Stub Stands** made from clean room compatible aluminium sheet with a thickness of 1.25mm.

PrePod SEM Stub Preparation Stand (for 11 Pin Stubs)

Solid, round and stable preparation station for all types and sizes of SEM pin stubs. Holds the stubs flat in numbered locations to avoid confusion when preparing multiple samples. Holds up to 11 standard 12.7mm Ø pin stubs. The centre hole is ideal for the large pins stubs (32mm or larger). Made from clean room compatible solid, hard anodised aluminium with three feet. Overall size including feet, is 90mm Ø x 30mm.
