P058 Knipex super knips, narrow tips each

Knipex super knips, straight cutting jaws accurately shaped for flush cutting soft wire 0.2mm to 1.6mm diameter.

P059 Knipex super knips, straight jaws each

Lindström RX Series Diagonal Cutters

Ergonomic ESD Dissipative

The RX range is manufactured from special steel with precision screw joint and lap-joint construction. All cutting edges are induction hardened to 63-65 HRC, for increased tool reliability and consistency. All models have a 3 position return spring (replaceable) to adjust the tool width and spring tension to suit individual hand sizes and strengths. Dual composition cushioned grip handles. ESD protection for conducting away static electricity, to European standard EN100 015.

Model RX8141 flush cutters, length of cut 10.5mm, cutting capacity - copper wire 0.10 to 1.25mm. Overall length 135mm.

P230 Lindström 'RX' diagonal cutters each

Model RX8247 flush oblique cutters, 45° angle. length of cut 6.7mm, cutting capacity - copper wire 0.20 to 1.00mm. Overall length 135mm.

P231 Lindström 'RX' oblique cutters each

P496 Spare torsion springs pk5

Electricians Pliers

With pipe grip, side cutters and two joint cutters. Polished head. PVC handles insulated to withstand 1000 volts AC, 1500 volts DC.

P233 Electricians pliers each

De-Soldering Pump

This tool may be loaded and unloaded with one hand. The tip is replaceable, it is made of low resistance Teflon for long life. The spring loaded stroke and convenient size, together with the superior suction makes this a highly efficient unit, care and maintenance are reduced to a minimum because of the simple design and construction – only 3 separate pieces. Length 217mm, tip diameter 3.00mm

P197 De-Soldering pump each

P197/1 Replacement tip each
